SUMMARY

Versatile software engineer with about one year of professional experience across backend, full-stack and QA. Builds REST APIs and integrations in TypeScript and Node.js, including electronic-invoicing services connected to Costa Rica's Hacienda v4.4 tax system and a secure multitenant backend for data processing (JWT, Zod, Prisma over MySQL/PostgreSQL, AWS). Also builds full-stack web apps with Next.js and React. Strong QA background from assisting TEC's Software Quality & Testing course, covering the full testing life cycle (manual, API and automated testing). Comfortable with Agile/Scrum, unit testing and code review. Finishing a B.Sc. in Computer Engineering (October 2026).

EXPERIENCE

Software Developer

CyberPro Costa Rica

Feb 2026 – Jun 2026

San Carlos, Costa Rica

- Built REST endpoints and backend logic for an enterprise ERP/POS suite, including electronic invoicing for Costa Rica's Hacienda v4.4 tax system, plus accounting, purchasing and HR modules.
- Built a centralized multitenant backend that receives, processes and stores operational data (employees, devices, GPS locations, work schedules), keeping each company's data isolated with JWT authentication and Zod validation.
- Wrote and optimized SQL queries with Prisma ORM (MySQL/PostgreSQL) for reporting and data-processing across ERP modules.
- Built Android features, including real-time GPS tracking of devices and field staff.
- Tested the APIs: wrote test cases and regression checks in Postman against Hacienda's sandbox and reported clear, reproducible bugs to keep releases reliable.

Tech: Node.js, Express.js, TypeScript, Prisma ORM, MySQL, PostgreSQL, REST APIs, Android, Java, AWS (RDS, S3, SES), JWT, Zod, Postman, Jest, Azure DevOps, Git

QA & Testing Assistant

TEC Costa Rica (Part-time)

Aug 2025 – Jun 2026

Santa Clara, Costa Rica

- Reviewed and graded test deliverables, lab work and assignments for around 20 students per semester in TEC's Software Quality & Testing course, giving written feedback on test design, coverage and defect reporting.
- Used static verification (reviews, walkthroughs, inspections, checklists) and dynamic test design (black-box, white-box, exploratory) across all test levels (unit, integration, system, UAT).
- Built and reviewed automated test suites with Jest, Jasmine + Karma, Cypress, Playwright and JMeter (performance) within Agile/DevOps workflows.

Tech: Jest, Jasmine, Karma, Cypress, Playwright, JMeter, Postman, V&V, Test Automation

Software Developer

TEC Costa Rica

Aug 2025 – Nov 2025

Santa Clara, Costa Rica

- Built a responsive, multi-language tourism website with Next.js 15, React 19 and TypeScript, focused on performance, accessibility and SEO.
- Built serverless API endpoints for contact and phone-validation flows, adding rate limiting, Zod validation and email delivery through Nodemailer/SMTP.
- Integrated Firebase (Firestore, Auth, Remote Config, Cloud Functions) and managed global state with Redux Toolkit.

Tech: Next.js, React, TypeScript, Redux Toolkit, Tailwind CSS, Zod, Firebase, Nodemailer, Node.js, REST APIs

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Java, SQL
- **Backend:** Node.js, Express.js, Prisma ORM, REST APIs, Socket.io, Flask, Nodemailer
- **Frontend:** React, Next.js, React Native, Redux Toolkit, Vite, Tailwind CSS, HTML5, CSS3
- **Databases:** MySQL, PostgreSQL, Firebase, Supabase
- **Cloud & DevOps:** AWS (RDS, S3, SES), Azure DevOps, Git, GitHub, CI/CD, ESLint/Prettier
- **Testing & QA:** Manual, functional & API testing, test-case & test-plan design, STLC, UAT, regression & cross-browser testing, bug reporting; Jest, Cypress, Playwright, Jasmine + Karma, Postman, JMeter
- **Methods:** Agile/Scrum, SDLC, unit testing, root-cause analysis, OOP, data structures & algorithms

EDUCATION

B.Sc. in Computer Engineering

Instituto Tecnológico de Costa Rica (TEC)

2020 – Oct 2026
Santa Clara, Costa Rica

- Graduating October 2026; all coursework and professional practice completed.

LANGUAGES

Spanish (Native) English (B2)
